

EXPLANATION OF COMBOS, UNITS AND PACKAGES

SAME POSE COMBOS

There are 7 different types of “combos” or units that can be configured in an 8X10 size photograph:

- (4) 3½ X 5
- (3) 4X6
- (8) wallets
- (4) wallets with (2) 3½ X 5
- 5X7 with (2) 3½ X 5
- 5X7 with (4) wallets
- (2) 5X7

Please note that each unit is priced differently. You will get the best value PER PHOTO by buying in units. However, if you don't want or need a full unit, you may order from the Partial Unit section but you will notice that the “per photo” price is higher.

PARTIAL UNITS

You must watch the minimums you need to order with wallets. You can order however many you want, but the pricing will always bump up to the next increment of 4.

While you can now order singles of any size, please note that in general, you save 50% on the photos required to bump up from a partial unit to a full unit!!

Great deal for 5X7 combos: add (2) 3½X5's for only \$7 and (4) wallets for only \$9.

UNIT PACKAGES

- The packages are UNIT packages which means that each line item of the package is either an 8X10 or one of the six SAME POSE 8X10 UNITs listed above and on the price sheet. So, for example, when you see a package with (4) 5X7's that means you have to order in sets of 2 because a 5X7 UNIT is made up of (2) 5X7's. You cannot order 4 single 5X7's and receive the discount offered in a package. Same holds true for the (8) wallets and (3) 4X6's.
- Please note the restrictions for how many poses you can choose from for each package listed. Package A must be all from ONE pose. Package B, you can choose from TWO poses and Packages C&D you can choose from THREE poses. Please note that you must still order in the same pose combos listed.
- You can swap out different units offered in a package but if the unit is priced higher than what is offered, you will pay the difference in price.
